THE BASSANO MAIL, THURSDAY, MAY 20, 1938.

## Hussar Celebrates Empire Day; Norman Edge Wins Bucking Horse

**HUSSAR, May 25.**—The annual sports day and stampee at Hussar on the 24th was a splendid success both as to crowd and entertainment. The weather was fairly propitious until evening, when there was a heavy rain, which served to increase the crowd for the dance, as many could not leave till later.

As usual, the forenoon was given up to school children's sports, and there were many participating. The committee in charge were: W. D. Moffat, W. J. C. Kirby, E. J. Bell and W. R. McLean.

With close competition, the winners of events were:

### Boys' Events

10 Years and Under  
50 Yard Dash, 1. Jack Treacy;  
2. Elliott Long, 3. Glen Broad.  
Broad Jump, 1. Elliott Long; 2. P. Crough; 3. Eugene Broad.  
High Jump, 1. Jack Treacy; 2. Elliott Long; 3. Philip Crough.  
15 Years and Under  
50 Yard Dash, 1. Jack Treacy; 2. Elliott Long; 3. Philip Crough.  
Broad Jump, 1. Elliott Long; 2. P. Crough; 3. Eugene Broad.  
High Jump, 1. Jack Treacy; 2. Elliott Long; 3. Philip Crough.

### Girls' Events

10 Years and Under  
50 Yard Dash, 1. Ellen White; 2. Shirley Hulen; 3. Dorothy LeGrand.  
Broad Jump, 1. Ellen White; 2. Shirley Hulen; 3. Dorothy LeGrand.  
High Jump, 1. Ellen White; 2. Shirley Hulen; 3. Dorothy LeGrand.  
15 Years and Under  
50 Yard Dash, 1. Anna Margaret Moffat; 2. Lois Schooning; 3. Dorothy LeGrand.  
Broad Jump, 1. Anna Margaret Moffat; 2. Lois Schooning; 3. Dorothy LeGrand.  
High Jump, 1. Anna Margaret Moffat; 2. Lois Schooning; 3. Dorothy LeGrand.

### Boys Open

100 Yard Dash, 1. Loren Moffat; 2. Emerson Brown; 3. Glen Treacy.  
Broad Jump, 1. Loren Moffat; 2. Emerson Brown; 3. Glen Treacy.  
High Jump, 1. Loren Moffat; 2. Emerson Brown; 3. Glen Treacy.  
15 Years and Under  
50 Yard Dash, 1. Loren Moffat; 2. Emerson Brown; 3. Glen Treacy.  
Broad Jump, 1. Loren Moffat; 2. Emerson Brown; 3. Glen Treacy.  
High Jump, 1. Loren Moffat; 2. Emerson Brown; 3. Glen Treacy.

### Girls Open

10 Years and Under  
50 Yard Dash, 1. Ellen White; 2. Shirley Hulen; 3. Dorothy LeGrand.  
Broad Jump, 1. Ellen White; 2. Shirley Hulen; 3. Dorothy LeGrand.  
High Jump, 1. Ellen White; 2. Shirley Hulen; 3. Dorothy LeGrand.  
15 Years and Under  
50 Yard Dash, 1. Anna Margaret Moffat; 2. Lois Schooning; 3. Dorothy LeGrand.  
Broad Jump, 1. Anna Margaret Moffat; 2. Lois Schooning; 3. Dorothy LeGrand.  
High Jump, 1. Anna Margaret Moffat; 2. Lois Schooning; 3. Dorothy LeGrand.

### Boys Open

100 Yard Dash, 1. Loren Moffat; 2. Emerson Brown; 3. Glen Treacy.  
Broad Jump, 1. Loren Moffat; 2. Emerson Brown; 3. Glen Treacy.  
High Jump, 1. Loren Moffat; 2. Emerson Brown; 3. Glen Treacy.  
15 Years and Under  
50 Yard Dash, 1. Loren Moffat; 2. Emerson Brown; 3. Glen Treacy.  
Broad Jump, 1. Loren Moffat; 2. Emerson Brown; 3. Glen Treacy.  
High Jump, 1. Loren Moffat; 2. Emerson Brown; 3. Glen Treacy.

### Girls Open

10 Years and Under  
50 Yard Dash, 1. Ellen White; 2. Shirley Hulen; 3. Dorothy LeGrand.  
Broad Jump, 1. Ellen White; 2. Shirley Hulen; 3. Dorothy LeGrand.  
High Jump, 1. Ellen White; 2. Shirley Hulen; 3. Dorothy LeGrand.  
15 Years and Under  
50 Yard Dash, 1. Anna Margaret Moffat; 2. Lois Schooning; 3. Dorothy LeGrand.  
Broad Jump, 1. Anna Margaret Moffat; 2. Lois Schooning; 3. Dorothy LeGrand.  
High Jump, 1. Anna Margaret Moffat; 2. Lois Schooning; 3. Dorothy LeGrand.

### Boys Open

100 Yard Dash, 1. Loren Moffat; 2. Emerson Brown; 3. Glen Treacy.  
Broad Jump, 1. Loren Moffat; 2. Emerson Brown; 3. Glen Treacy.  
High Jump, 1. Loren Moffat; 2. Emerson Brown; 3. Glen Treacy.  
15 Years and Under  
50 Yard Dash, 1. Loren Moffat; 2. Emerson Brown; 3. Glen Treacy.  
Broad Jump, 1. Loren Moffat; 2. Emerson Brown; 3. Glen Treacy.  
High Jump, 1. Loren Moffat; 2. Emerson Brown; 3. Glen Treacy.

### REMINDER TO GOLFERS

Members of the Bassano Golf Club are reminded to hand in a 27 hole card by the evening of June 3rd in order to determine handicaps for the coming competition.

Anyone not handing in a card will be classified as a scratch player. The competition is open to all members of the club, so make an effort to hand in your scores.

### GOLF CLUB TO VISIT BASSANO

(Brooks Bulletin)

The Brooks Golf club has received an invitation from the Bassano Golf Club to participate in an inter-club match at Bassano on Sunday, June 9. The Bassano club will arrange the matches and serve refreshments to all visiting players. Any player who wishes to make the trip should notify the secretary of the Brooks club as soon as possible. The names of players should be in the hands of D. Macdonald so that the draw can be arranged.

The Bassano club requests that play should start not later than 1:30 on Sunday afternoon.

### COUNTESS

**COUNTESS, May 25.**—Harry Walsh and Miss K. B. Walsh and Mrs. M. E. Ferguson went for a trip Sunday across the river to spend the day with Mrs. Walsh.

Marie Chamberlain of Gem spent the weekend here with her sister, Mrs. M. E. Ferguson.

The Water Users association held an election on Saturday at the hall to elect directors for the year.

Mrs. C. A. Sims and Mr. M. H. Gamble were callers at the H. home on Thursday.

### CLUNY NOTES

**CLUNY, May 28.**—Last Tuesday afternoon the Cluny Brothers visited the Broodens at the Old Sun Indian school, Cluncheon.

Mrs. L. P. Haymond was a visitor in Calgary part of last week.

Miss Mrs. W. H. McLean, Mr. McLean's brother and son Bobby, spent the week of the 24th in Hussar where they attended the stampee and dance.

Mrs. J. Clark and Mrs. G. Heattie returned from Edmonton on Friday after attending the W.I. convention at the A.M.A. was held at all efforts of committee for the betterment of roads, providing it would help improve the business of the motorist.

As a result Mr. Robert Clark, who was in the motorist of the Trans-Canada Highway through Bassano.

On Friday afternoon our local band from Frank Nowicki, led his Redskin band from St. Joseph's school in the parade at Cluncheon. We understand he has received offers from Calgary to attend the stampee and dance.

The events were interrupted by a heavy rain and light hail storm, but the riders kept the crowd interested by continuing events in spite of the downpour.

Half Mile Free-for-all, 1. Spring Chief; 2. Tom Peak; 3. Jack Big Eye.

Half Mile Indian Race, 1. Mac Spring Chief; 2. Jack Big Eye; 3. Running Rabbit.

Half Mile Slow Race, 1. Phil Desjardins; 2. John A. Swale; 3. Tom Peak.

Half Mile Relay Race, 1. Spring Chief; 2. Phil Desjardins; 3. Tom Peak.

Three Some Race, 1. Big Eye; 2. Little Big Eye; 3. Democratic Race, 1. Tom Peak; 2. Joe Swain; 3. Jack Swain.

The officers, W. G. Nelson, president; H. D. Brown, treasurer; P. H. Reeves, secretary, were well satisfied with the results of the day. The boys' race had soft drink and carnival booths, and the G.I. guides had a refreshment booth, and the Ladies Aid served supper at 5 and at the dance.

The Ladies Aid will meet at Mrs. W. A. Treacy's on June 19, Wednesday, instead of the Wednesday before.

Mr. and Mrs. Coffey and children visited friends here a week ago Sunday.

### ANNOUNCEMENT

(From Calgary Herald, May 25).  
Mr. and Mrs. James Johnston, Bassano, Alberta, announce the engagement of their second daughter, Helen Marjorie, to Mr. E. Murray Connelly, son of Mr. and Mrs. J. G. Connelly, of Calgary. The wedding will take place on June 12.

### Improvements Planned For Local Swimming Pool

Board of Trade Will Install Sewage System—Other Improvements—Plans for July 1st Celebration.

The Board of Trade, at its bi-weekly meeting, passed a resolution to improve the Swimming Pool to the extent of installing a water line, sewage system and flush closets. The buildings will be moved to the east side, the old drain taken up and a new one installed with a sluice gate; a shower may also be installed. The matter was left to the discretion of the Swimming Pool Committee for further improvements to the Pool.

Followers of swimming will welcome this news with delight, as the intended improvements will make a clean, up-to-date pool that will indeed be a credit to the town.

Suggesting that an immediate start be made on the July 1st Celebration, Jas. Johnston recommended the decorating of the rink building, the floor in which will be completed by the middle of June. He also advised the appointment of a Carnival Manager, get things in shape in the building for the carnival.

The Board of Trustees, through W. S. Playfair, stated that a plan of sports events for homecoming had been drawn up. An advertising committee was appointed to confer with the trustees for the printing of posters and advertising.

Dr. Barlow reported for the Cemetery Committee that trees were replanted, shrubs are being planted and watering was being done on the grounds.

A motion by W. K. Webb that \$15 be donated to the Bassano Music and Dramatic Festival Assn. as a grant was passed by the Board.

The donation of \$1000 from the Fire Brigade was acknowledged with sincere thanks by the vice-president. The Board of Trade, weighing scales, though receiving the inspection certificate, need an overhaul, and on motion by A. McKee the matter of repairing them was referred to the hands of the executive committee.

### Gives Address

Mr. Joel of the Alberta Motor Association, gave a short address on the organizing, aims and accomplishments of the Association. He stated that the A.M.A. was based on all efforts of committee for the betterment of roads, providing it would help improve the business of the motorist. As a result Mr. Robert Clark, who was in the motorist of the Trans-Canada Highway through Bassano.

Vice-President H. W. Harper occupied the chair in the absence of President F. D. McNaughton.

Harry Coleman of Brantford, Ont. is visiting Mr. and Mrs. W. R. McLean on his way home from the west.

David Nelson was in town Friday on his way to attend the Hussar stampee.

Albert Smith held the lucky ticket on the Red Cross chance, which was raffled at the dance last Thursday.

### THE BOARD OF TRUSTEES

The contract holders of the Eastern Irrigation Club have chosen a board of trustees to conduct the affairs of the project. Under democratic government the will of the majority controls. It is now up to the board to give wise supervision and to the settlers to support the trustees.

As has been stated in this newspaper before, there is a great opportunity here for wise leadership. This irrigation project can be made successful. The district can be made a prosperous one. But all must pull together.

The experience of similar projects elsewhere is that the major troubles lie in internal dissension. We hope that in this instance there will be little of this trouble.

The objective of the irrigation district is to permit all settlers to own their own farms, to make the water rates as low as possible and to build up a substantial reserve to protect against unexpected difficulties that may be encountered.

There is no farming area anywhere in the west that has the same opportunity for development as has this irrigation district. It's fate rests in the hands of its people.

## Anderson, Dahl and Scott Chosen Trustees Eastern Irrigation District

### GEM

**GEM, May 25.**—Most Gemies were too busy to celebrate Victoria day, but a few decided that prosperity comes so far off that they might as well enjoy some of the byproducts along the way. As a result they took the road to Hussar to join in the celebration there. Among those who went were: Mr. and Mrs. R. W. Wade and family, Miss Joanna Knorr, Ralph Waltham, Miss L. Pollock, W. K. Kivimäki, Mr. and Mrs. W. Wade, Miss Ellen Patchett, Mr. and Mrs. Ray Dickman, George Dickman and W. C. England.

Miss M. Chamberlain spent the week end with her sister, Mrs. Max Gamble also spent the week-end at home.

Mr. and Mrs. Ray Dickman of Chicago, Ill., accompanied by Mrs. E. Turner and George Dickman, spent Monday visiting friends in the colony. Mr. and Mrs. W. A. Pollock and family were visitors on Sunday at the home of Mr. and Mrs. H. P. Ferguson of Countess.

How's this for a cordial reply to a "dig"? The "budding pianist" hereby invites the gem saxophone specialist to make it a duel. There's room on the front seat for two.

### VILLAGE OF HUSSAR

#### NOTICE

Notice is hereby given that, under the provisions of The Tax Recovery Act 1929 the Village of Hussar will offer for sale by public auction, at the office of the Secretary-Treasurer in the Village of Hussar on Thursday June 20th at 2 o'clock in the afternoon the following lands:

Lots	Block	Plan
4, 5, 6, 7	2	620 A.P.
32	2	6780 A.M.
6, 38	3	"
7	"	"
12, 19, 21, 22, 31	8	"

All that portion of the S.E.¼ of Section 14, Township 24, Range 20, West of the Fourth Meridian, in the Province of Alberta, bounded as follows: On the N.E. by the S.W. ¼ of lot 1st Avenue, on the N.W. by the S.E. ¼ of lot 1st Avenue, on the S.W. by a line drawn parallel with and 100 feet perpendicularly distant south westerly from said lot of 1st Street, and on the south-west by the north westerly limit of the railway right-of-way; said Avenue, Street and right-of-way being shown on a plan of record in the Land Titles Office for the Southern Alberta Land Registration District, as Bassano, 6780 A.M. and R.W. 5 respectively, enclosing thereon the north-west ¼ of the north-easterly 125 feet thereof.

Said parcel will be offered for sale subject to a reserve bid, and subject to the reservations contained in the existing certificates of title. Terms cash, unless otherwise arranged. Redemption may be effected by the payment of the full amount of arrears of taxes and costs, at any time prior to the sale.

Dated at Hussar, Alberta, this 23rd day of May, 1938.

MRS. CAROLINE REBEYS,

Secretary-Treasurer.

### RESULTS OF ELECTION BY POLLS

	C. Anderson	H. Dahl	H. Jones	R. Scott	T. White
Brooks	24	22	7	20	17
Scandia	32	9	22	11	22
Rainier	34	12	29	3	27
Tilley	58	27	105	21	
Patricia	23	18	7	20	7

Cassile	9	0	11	7	9

TOTALS: 441 321 194 335 188

### TO THE ELECTORS OF THE EASTERN IRRIGATION DISTRICT

We, the undersigned, sincerely thank you for the very splendid support you gave us in the recent election. We assure you that we appreciate your confidence and that we shall do our utmost to deserve the trust placed in us.

ROBERT SCOTT

HENRY DAHL

CARL J. ANDERSON, Jr.

### CHANCELLOR

**CHANCELLOR, May 27.**—Another meeting of the Social Credit Club was held on Tuesday night in G. C. Phillips' store. There was a large crowd in attendance. At the next meeting Ed Kelly will give a paper on Social Credit.

Our Chancellor school baseball team played at the South Valley school on Wednesday afternoon and lost with them with a score of 6-8. South Valley team is expected to play there next Monday.

Misses Amelia and Marie Gronberg of Bassano visited with Mr. and Mrs. M. B. Blair on Tuesday evening. Mr. Perry Barker was also a guest at this occasion.

Miss Marjorie Grant went to Calgary on Thursday evening to spend the week-end with her parents. Sigurd Nelson, one of our prominent farmers of Chancellor, was united in marriage to Miss M. H. Wayne on Saturday, May 18. The marriage took place at Standard with Rev. Dick officiating.

Among those who attended the Hussar stampee and dance on May 24 from Chancellor were: Mr. and Mrs. M. B. Blair, Mr. and Mrs. H. L. Blair, Mr. and Mrs. E. H. Young, Mr. and Mrs. A. E. Hobbs, P. B. Barker, P. Husey, Henry Heger, Esther and Evelyn Pedersen, Vern and "Pop" Hanson, Miss Leving, Pauline, Miss Evelyn Hansen, Miss Betty Fraser, Arnold and Raymond Law and Billy Fraser.

### PARENTS TO MEET

A meeting of parents of the local Jr. High students and the members of the School Board will be held this Monday evening in the Town Hall to make a final decision on present arrangements in the High School building.

At present the parents pay fees to provide the salary of the second teacher, and as many are negligent in meeting these fees, and the trustees are personally responsible for paying the salary, the latter refuse to carry on under these arrangements.

The Board has taken the stand that it must resolve itself into the parents forming together to collect the fees, or operating on some similar plan.

### HOPPER POISON

Jack Hood, local elevator agent in charge of the Grasshopper Poison mixing station, has received instruction from the Dept. of Agriculture to proceed with the mixing of poison bait. A Gov't. Field man will be in town within the next few days to supervise the operation of the plant here.

Infestation is not serious, the only report for bait so far being from Glenfield, south of Bassano.

Gen Phillips accompanied by Mrs. H. Channery and F. Watson motored to Calgary on Wednesday.

Carl Anderson Jr. of Scandia, Henry Dahl of Duchess and Robert Scott of Tilley were the choice of the electors of the Eastern Irrigation district. Carl Anderson Jr. of Scandia of the district in an election held last Saturday, R. H. Jones of Bassano and W. Tait White of Brooks were the other two candidates.

The settlers of the entire district voted at 12 polling booths, one at each centre of population throughout the project. Very few ballots were spoiled, the instructions given to them enabled them to understand what was required.

A total of 1,479 good ballots were cast. They counted the most votes with a total of 457.

### Calgary Tennis Club Here Sunday

(Calgary Herald)

"A strong team representing the Calgary Tennis Club will set out for Bassano to meet the Bassano club. The following will make the trip: Bruce Ogilvie, J. Clark, T. Stark, Doug Gunn, Les Severn, A. McDonald, Mrs. McDonald, Misses D. and H. Roberts, Gordon North, Hugh Boucher, A. C. Wilford, Mrs. O'Riordan and Miss Peggy Nicol.

"The Calgary team is particularly strong, but reports from Bassano have warranted the inclusion of Doug Gunn and Billy Stark."

Though not expecting such a powerful contingent from Calgary, the local club will endeavor to offer the visitors some good competition.

### BASEBALL

By a score of 12-11, the local Jr. High lost to Rosemary at the latter's grounds last Saturday. Much good playing was exhibited by both sides before a fair crowd.

Scores for games were made by John (D.), J. Clark (D.), G. Silcott (D.), W. Marguardt (D.), W. Basar (D.), Ted Stiles (D.), and J. Schaffert (D.).

The return game will be played here this Sunday.

### ROSEMARY

ROSEMARY, May 20th.—Mr. and Mrs. Russell and son and Mr. and Mrs. Green of Lethbridge were visitors in the L.D.S. Hall on Sunday.

Roy Eastman shipped a car of baby beef to W. Paul Smith. The stock was taken to Bassano first to be weighed.

Mr. and Mrs. J. Adams entertained Mr. and Mrs. Wm. Taust and son to dinner on Sunday.

Members of the Beckwith family motored to Cassile Saturday to attend the services and program.

Audrey McLeod attended the Stampee and Dance in Hussar on the 24. Dorothy McLennan entertained a number of friends to her birthday party on Sunday.

Mr. and Mrs. Roy Eastman and family and Mr. and Mrs. Gen Martin were Bassano callers last evening.

Mr. and Mrs. J. L. Young called on Mr. and Mrs. T. Adams Sunday.

## Recent Tests Under Practical Conditions Show That Television Is Now Beyond Inventive Stage

For years we have been told that television was "just around the corner." When, therefore, David Sarnoff assured the stockholders of the Radio Corporation of America that the fruits of research were about to be exhibited to a chosen few—and this means next year—he must have been aware of the skepticism with which his predictions would be received by the thousands who have been waiting to push a button and twist a dial to behold the Canadian as he addressed them or watch the winner of the Derby leading the field.

The fact that Mr. Sarnoff commits his company to tests under practical conditions is in itself evidence that television has been carried beyond the early inventive stage. He pins his faith on the conscience of Dr. Vladimir K. Zworykin, an apparatus which sprays electrons like paint to form an image on a highly exhausted tube, and which, there is every reason to believe, deserves the praise that has been lavished upon it. If television has been so long in coming, it is partly because the entirely new field of electron optics had to be developed. Now that the foundations have been laid, the engineer can design televisions which may be expected to give more critical results than those they like what they want and indicate what they want. The sum of \$10,000,000 which Mr. Sarnoff has set for this prudent groping in the dark is small. In the end much more will be spent before sets appear which will withstand the efforts of disbelievers to wreck them. Edison developed elaborate machines to kick, bounce and otherwise abuse his storage battery. Knowing, as he once said, that "it will be put out of business in five minutes by any truck driver." Years passed before he discovered how the ingenuity of ignorance could be thwarted.

There never was a technical problem so difficult as that presented by television. In the light of present knowledge the country must be deluged with high transmitting stations, and this for the reason that the image-carrying waves, like those of light, are easily blocked by tall buildings and mountains. Thirty miles is the range of a transmitter. Hundreds of millions must therefore be invested in a myriad stations. And there still remains the task of providing a public that flicks once a week to the motion-picture theatre with a new play every night. It is easy to understand why only a million should be cautiously set aside to take the first step.

What is especially encouraging in Mr. Sarnoff's announcement is the implication that the laboratory has been at work in these years. The timidity of capitalists is proverbial. Yet here we have an example of their optimism, their courage, their readiness to create a new art and a new industry, and to realize a romantic ideal. Television is not likely to extricate the world from the financial mire. Yet it may well receive its strongest impetus in the darkest of economic cycles, and this because there is an unquenchable faith in the part that the scientist and the inventor can play in the onward sweep of society. New York Times

### Few Aircraft Accidents

Figures Indicate That Aviation In Canada Offers Comparative Safety

Evidence that aviation in Canada is becoming increasingly safe was shown in figures compiled by the civil aviation branch of the department of national defence on aircraft accidents during the last three years. The figures show that in 1934 Canadian aircraft flew 6,497,637 miles and that in 75,871 aircraft hours required to fly those miles, 12 persons were killed and nine injured. Among the dead were three passengers, four pilots, three other crew members and two bystanders. Seven pilots and two passengers were hurt. In 1933 the total number of deaths was 25, including 12 passengers and eight pilots. Thirteen persons were hurt, including five passengers. The aircraft miles flown were 4,338,351, almost 2,000,000 less than in 1934. In 1932 a total of 12 persons were killed and 13 injured, while the mileage flown was a little more than 1933.

The 1934 record of fatalities also shows one person killed per 928,234 miles flown, compared with one in 453,831 miles in 1933 and one in 571,141 in 1932. One passenger was killed per 2,165,978 miles flown, compared with one in 378,193 miles in 1933 and one in 1,523,044 miles the year before.

### Safety On The Highways

Motorists Who Decide To Be Careful Will Help Greatly

After a season of rain, the matter of safety on the highways is up to the motorists. They can decide for themselves whether this summer is to be a time of happy motoring or of the road, or a season of growing terror, accident or death. If all intelligent, responsible motorists decide to be careful, to drive carefully and reasonably, and observe the courtesies of the road, if they will be patient and obey scrupulously all laws and regulations, reasonable or unreasonable, because they are laws, not because of fear of penalties, the problem of safety will be solved. Reckless, careless, indifferent and incapable driving causes most casualties. The trouble is not with the cars, they are as good as new, but with the driver. The trouble is with the human equation which can be taxed only so far. Speed will have to be kept down, either by reason or human capacity if deadly accidents, and in particular crashes between car and car and tragic roadside pileups are to be reduced. The speed problem may never really be solved anywhere except as result of the working of an aggressive, militant public sentiment. But safety is up to the driver.—St. Catharines Standard.

### Claim Magical Powers

Tibetans Assert They Can Create Heat By Suggestion

The mysterious powers of the Tibetans were described at Berlin, Germany, by Dr. Pythofuth, leader of an expedition which has just returned from the Himalayas. Telepathy, he said, is employed in Tibet just like the telephone in Europe. A messenger was sent on a 12 days' journey to the headquarters at Darjeeling to report the death of a bearer. When he arrived there he found that the local natives had already informed the officials of the man's death on the same evening on which it occurred.

He told how the Tibetans are able to create warmth through the power of suggestion. They cannot only send the light in the sun, clad only in a shirt, but by the heat given out from their bodies can dry wet clothes placed on them.

One who can dry six such cloths is a "pupil"; he becomes a "master" when he can dry 20.

**Becoming More Modern**  
Medicine, nursing, dentistry, pharmacy are the principal sciences that are attracting Japanese women. Leading women in Tokyo have a society to study the modern administration and general city affairs. By contrast, the Japanese women in the modern life of the nation as a tremendous force economically, socially and personally.

**Socialist:** "After all, what is the difference between the rich man and the poor man?"  
**Bystander:** "The rich man has cancer laryngitis and the poor man has a cold."

### Survey Tells The Tale

Shows Western Ontario Has More Horses Than Cars

"Now that the automobile has taken the place of the horse"—famous words of an after-dinner speaker.

But look at this excerpt from one of the surveys recently made by W. H. Wood, manager of the London (Ont.) Chamber of Commerce. "The passing of the stage coach and the coming of the automotive vehicle has not by means of the passing out of the horse, for there are to-day in Western Ontario over 82,500 more horses than automotive vehicles."

There are 243,000 horses valued at more than \$21,478,700.

There are 160,450 automotive vehicles which averaged at a value of \$1,000 each represent \$160,450,000.

"The value of the automotive vehicles over the horses is in favor of the first mentioned by more than \$138,970,000."

### India Saves Millions

Machine Has Been Invented To Kill Off Insects

A machine designed to rid India of its traditional pestilence of mosquitoes and other insects around which spread comment at Hyderabad, India, following a successful demonstration by its inventors, the French engineers, Messrs. Monache and Demoultre. Experts witnessing the demonstration declared the machine, which consists of an ultra-ray burner and a suction fan, is probably the best means of destroying insects that has ever been demonstrated.

The machine is said to be particularly effective against agricultural insects, which do millions of dollars worth of damage to crops in India every year.

Your breakfast coffee may soon be brought to the table in the form of chips, about six-hundredths of an inch long and only three-hundredths of an inch thick.

## The SNAPSHOT GUILD

Get In The Picture Yourself

You too can get in the picture if you use the self timer.

"I enjoyed the Snapshot Guild last week very much, for taking snapshots of my children is almost a hobby with me," wrote a reader. "I was hoping, however, that you would tell mothers how to include themselves in the picture with their children," she continued.

Perhaps others are interested in this subject. The self timer is a most fascinating little gadget and almost human in its operation. It is an expensive accessory that fits over the metal button or plunger, at the end of the cable release, which you press to take a snapshot with a folding camera. It cannot, however, be used unless the camera is fitted with the cable release.

Here is how it works. First, you locate your subject in the finder and at the same time plan the space you will occupy when you stand in the picture. Suppose you want to take a picture of Jane sitting in your lap as you read to her. You will have to have the camera on a tripod, unless the camera is fitted with the chair in the finder—and be sure you can see all of the chair, especially the upper part of the back where your head will appear. For if you are not sure, you will find you have dekapitated yourself when the finished prints are returned.

If the picture is to be taken indoors you will have to apply all the rules of indoor photography. The diaphragm should be set at f.8, the shutter speed at either 1/10 or 1/25 of a second and you will need one or two photo-flood lamps placed in an ordinary floor lamp (with the shade removed) to give more illumination to the side away from the outside light.

When the diaphragm is set at the proper opening with the correct shutter speed, the same as if you were going to snap the picture yourself, set the self timer for ten seconds or a minute, depending on how long it will take you to get into the chair and Jane comfortably seated in your lap, ready to listen to your story. Turn on the photo-flood lamp in a minute, press the shutter and it starts buzzing away, and click it has taken your picture. In spite of the simplicity of the procedure Jane is going to get a brilliant picture of you and Jane sitting in your lap, and you will have a million dollar smile and a picture worth the value of the picture.

You can purchase the self timer attachment from almost any store that sells cameras. They are not expensive and last a lifetime. Some cameras have self-timers incorporated in the shutter so you have this type of camera and have never used the self timer you have since a lot of fun and picture possibilities.

## Saskatchewan Mine Is Worked Under Direction of First Woman Coal Mine Operator In Canada

### Skill Is Required

Managing A Parachute Not As Simple As It Looks

Pilots and officials of airlines in New York explained why passenger airplanes do not carry parachutes for passengers, which, many persons thought, after a new of a recent crash in Missouri, might have insured safety for the victims. No passenger airline in the world, they said, requires parachutes on a plane, because they believe that a parachute would cost more lives than they would save. To open a parachute is a knack and requires a certain familiarity with their mechanism, he said, a parachute is not adjusted so easily as a life preserver on a ship, and passengers are untrained in this technique.

Furthermore, it was said, dropping in a parachute and landing safely is not easy, the must count five slowly before pulling the ring which releases the parachute folds. If one pulls the ring too soon, the chute folds in the fall of the collapsing ship and disaster follows. It takes considerable resolution and much practice when one is falling rather than rapidly to wait until the proper second to pull the ring.

The parachute jumper must steer his parachute to clear obstacles before he reaches the ground and make a landing. It is almost certain death. A strong wind, which frequently accompanies airplane crashes, will drag the parachute along the ground and any skill in landing will avoid this mishap. In crashes of passenger planes, the consensus was, passengers are safer inside the plane. Most crashes occur on the take-off or at a low altitude and altitude is necessary to manipulate a parachute.

### Protect Civil Population

Compulsory Air Raid Drill May Be Enacted In Britain

Drafting plans which may call for doubling the home strength of the Royal Air Force at a cost of \$100,000,000 over and above the increased air estimates already brought down, the air ministry advised British aircraft manufacturers not to accept foreign orders without consulting the ministry.

While the ministry was warning manufacturers of the likelihood of a considerable demand on their facilities by the government it was forecast that compulsory air raid drills may soon be a feature of the life of the country. It is understood a country-wide scheme is in preparation to increase the population of the United Kingdom "air raid minded" as part of the comprehensive plans for protection of the civil population.

### Prefers His Records

French Meteorologist Has Own Idea About Forecasting Weather

"Weather forecasting is easy," said Philippe Mongeau, meteorologist for the French government near Cannes who has been visiting in Montreal. The necessary "constit" of a weather record for at least a century applicable to the district for which the forecasting is to be done. "I believe in the record of 'past weather,'" said Mr. Mongeau. "I would not cast discredit upon the scientific knowledge of groundswath, nor would I say it is incorrect to count the mists stored up by the squirrel I have an open mind. But I prefer my records."

### Prairie Tree Planting

Several of the provinces of the Dominion have made provision for the distribution of trees to farmers who are planting, at little or no cost to the recipient. The oldest established scheme of this nature is that originally established by the Forest Service, Department of the Interior, in the Prairie Provinces, and now operated by the Federal Department of Agriculture. This has its headquarters at Indian Head, Saskatchewan. The provinces of Ontario and Quebec have similar schemes.

### Connaught Cup Winner

Michael MacBrien, son of Major General J. H. MacBrien, commander of the Royal Canadian Mounted Police, was awarded for the second time the cup donated by the Duke of Connaught, former governor-general of Canada, for physically superior industry displayed during a gymnastic exhibition at Ottawa.

### In the national aristocracy of business, Miss Jessie Hamilton, daughter of mining dealer, occupies a niche among the first flight. To prove woman's claim to a choice of professions, she stepped from a Manitoba country school into the heart of Saskatchewan's coal fields and emerged Canada's first woman coal mine operator.

The hum of hoist engine, each capable of hoisting 500 tons of coal each day, penetrates the trim office as she occupies on her vast holdings a few miles west of Blenheim. But Miss Hamilton, who stripped her dress to carry on the work and plans laid by her father, explains it was all a matter of necessity. The mining she went into, before the death of her father, R. L. Hamilton, one of the early pioneers in this coal mining district, stood her in good stead for the career she was to adopt. She is a graduate in arts of the University of Manitoba. For a time she taught school at Mt. Pleasant, south of Churchill in northern Manitoba.

Kerely efficient, Miss Hamilton came to her rank as mining manager but alone by right of heredity but by a succession of achievements that rank her as a leader in a man's world. Since the opening of the mine in 1926, there has been a continuous record of such achievements in which the new owner has played no small part. Shortly after opening the new mine, thousands of gallons of water poured in on miners in the workings. Electric pumps were installed capable of pumping 17,000 gallons each hour. New cutting and shearing machines were employed and other improvements carried out to make the mine one of the leading shaft operations in the field.

Miss Hamilton is modest about it all. She does not like the suggestion she is a pioneer in the coal industry and she is precisely Canada's first woman mine operator. She has sufficient confidence in the men working for her to accept the responsibility and undertake to master detail associated with a mineable mine.

### Always Plenty To Do

Woman Guide-Lecturer In British Museum Likes Her Work

Miss Marion Thring, who, in competition with more than 200 men was the first person appointed to the Victoria and Albert Museum in London as full-time guide-lecturer, has finished her third month of work.

She has covered nearly 1,000 miles of the museum galleries and learned the facts about history and music of its uncounted treasures. But she must walk another 1,000 miles and do the same about history and music of its uncounted treasures. But she must walk another 1,000 miles and do the same about history and music of its uncounted treasures.

But she must walk another 1,000 miles and do the same about history and music of its uncounted treasures. But she must walk another 1,000 miles and do the same about history and music of its uncounted treasures. But she must walk another 1,000 miles and do the same about history and music of its uncounted treasures.

The only disadvantage of being a woman in her present job, she finds, is that she has no pockets. She carries the two huge master keys of the museum, which she is supposed never to put down, on a long cord about her neck.

### Arduous Journey

Returns After Journeys Of 400 Miles

Seven weeks of the most arduous trekking at an end, David Irwin, of Grand Rapids, Mich., was back in Canada after a journey of 400 miles. Irwin arrived at Churchill with his three dogs to draw him, and after a journey of more than 400 miles. Irwin was associated with Andrew Baird in the reindeer drive from the House of Commons, said in a report two years ago.

### Need More Planes

Liberals call for more fighting planes for Great Britain. Sir Herbert Samuel, Liberal opposition leader in the House of Commons, said in a speech recently in Lancashire. "The Liberals cannot take the responsibility," he said, of leaving the country of Canada, for physically superior industry displayed during a gymnastic exhibition at Ottawa.

### Armored Cars

Ministry Of National Defence Experimenting With New Type

The ministry of national defence is having experiments made by Canadian motor manufacturers in small armored cars—ordinary four-wheeled automobiles with special plating it is stated. The experiments are in the initial stage and are purely experimental. Reports that tanks were being made was strongly denied.

"Canada hasn't a tank in the country," a senior defence official stated, "nor has she the slightest intention of starting on tanks. These cars can be with no stretch of imagination be called tanks. We are just trying out a few experiments with ordinary cars for troops."

### Canadian Physical Association

Dr. A. S. Lamb, director of physical education at McGill University, was re-elected president of the Canadian Physical Association at the concluding session of the association's annual meeting in Montreal. Vice-presidents elected for the coming year included: W. G. Brandeis, Vancouver; Miss E. M. MacBrien, Winnipeg; Jack; Robert Jarman, Winnipeg.

## STAY IN THE SOUTH

Some of the enterprising sections of northern Alberta have been conducting campaigns to win farmers from the drier regions of the south to their particular districts.

This newspaper suggests that farmers who intend moving northwest should consider the matter very carefully before finally deciding. This spring gives an indication of what may be expected some years in the north. In some districts seeding has hardly started and it will soon be too late to plant even coarse grains.

Then large areas in the north and central parts of the province are composed of grey loam, which is not a good soil for wheat raising. It will grow clovers and grasses in abundance and also barley, but has not the reserves to continually grow wheat. A southern farmer moving on to such land would be in a worse mess than the one he departed from.

If southern Alberta farmers find their localities altogether too dry the best solution they can go to is the irrigated areas in the south. They will find no trees to chop down with arduous toil but trees to be planted where they adorn and protect. They will find railways, schools, churches, hospitals, good roads, telephones and all such accessories of an advanced community. They will find weather conditions to which they are accustomed, a soil of unequalled fertility, good neighbors and even old friends and acquaintances, and a real opportunity to make good.

A southern Alberta farmer will be infinitely better on a southern Alberta irrigated farm than in the stumps and muskies of large parts of the north, and his family will be happier and more comfortable.

## COFFEE DRINKING GAINING

Canadians are losing their taste for tea if the figures of import mean anything. They are drinking more coffee and less of the delightful beverage of Ceylon.

It is the influence of the neighboring giant nation, who are inveterate coffee drinkers, which is swaying Canadians from the brew which is so dear to British hearts. But swinging away they are. This is true particularly since gallant old Sir Thomas D'Alton died.

The figures for 1934 and 1935 (for the fiscal years which end in March) are:

	Tea (lbs.)	Coffee (lbs.)
1934	33,464,000	32,564,000
1935	30,379,000	33,349,000

Now, coffee is a delightful beverage, as many will testify, but well made tea cannot be beaten as a human drink. We do not refer to the green variety, so insipid and strange in taste, of course.

It is up to the tea producers to win Canada back to tea and they can do it only by continual education.

## MEDICAL SCIENCE MARCHES ON

The progress of medical science has been rapid in the past century. This statement is well illustrated by the fact that the first man to perform an operation for appendicitis died in Fergus, Ontario, only last week. Dr. Groves was his name and his age at death was 87 years.

At one time appendicitis was regarded as a fatal illness. Inflammation of the bowels was the term doctors used in referring to the hidden, burning pain. Nowadays an operation for appendicitis is not considered serious nor alarming. The removal of tonsils is almost as serious in the minds of many. So this disease has been defeated in one man's lifetime. So has the dread diphtheria, the scourge smallpox, tuberculosis, malaria and other plagues of the human race. The march of medical science has prolonged life and relieved suffering humanity to a marvelous extent.

It is reasonable to suppose that there will be no halting in this insistent search for the overcoming of disease. There are such maladies as cancer for which no cure has as yet been discovered, but into the cause of which a vast amount of thought and study is being expended.

Of the greatest blessings to mankind none exceeds that of good health. Health may be nullified, savings may be lost, homes may be destroyed, but health, once lost, is the great deprivation.

## SOLDIER MYSTIC DEED

One of the oddest figures which emerged from the Great War was T. E. Lawrence, who died a short time ago in England as the result of an accident.

Lawrence was student in archaeology at Oxford when the war broke out. Not much is known of his early days in the army, but strange rumors came from Arabia, where he had gone, of Lawrence taking a leading part in uniting the fierce tribes of that region, under the British flag, against the combined Turks and Germans.

The name of Lawrence became famous throughout the world and his feats reached the range of the legendary. He was supposed to have adopted native ways of living, along with a native costume, and to have become the uncrowned king of Arabia.

Ironically enough, his own morbid dislike of publicity was responsible to a large extent for the fantastic tales concerning him that constantly appeared in newspapers throughout the world.

Certainly he worked indefatigably behind the scenes and united the fierce tribes against the Turk, fanned flames of revolt all over the desert. This culminated in the capture of Damascus and the flight of Turkish armies from regions that they had held for half a century.

After the war Lawrence sought seclusion. He refused all honors save the rank of a colonel. He found employment in the air force in a humble capacity and remained there until his recent retirement.

This notable character always remained an enigma to his countrymen. His death followed an accident which occurred while motorcycling on a road in quiet old Dorsetshire.

## JUDICIAL REPARTÉE

The English Bench lost one of its ablest judges when Lord Darling retired after a quarter of a century of service. One of his favorite butts was the pretentious witness.

One day, when a man declared he "had been wedded to truth from infancy," Lord Darling inquired: "But how long have you been a widower?"

Another unwary witness who claimed to be a clairvoyant he immediately bowled over by the suave request: "Will you kindly tell us, then, the result of this action?"

Ten Minutes  
with the  
Scotch Philosopher

In haste to get their wheat in the ground this spring, many farmers neglected to cultivate before seeding. With the result that many fields are now green with weeds. This is a very unfortunate because the yield will be greatly reduced and future operations rendered more difficult. However, many fellows have been sadly short-handed and with time short against them did the best they could.

Waxing enthusiastic the other night, a disciple of social credit told his audience that even the Scotch and Jews were for it.

A gale of laughter rocked the hall when a rude voice called from the back: "That'll leave a hollow in for the rest of us, won't it?"

The oldest lad we ever heard of came to grief the other day. He had the audacity to wed two girls in the same town in Old Kentucky, and although the course of false love ran smoothly for a time, while out shopping with one the other came along. Perforce of his vows, the deluded maiden set on him with such heartiness that the deceiver was carried to an unconscious condition to a hospital. When he wakes up no doubt he will realize that retribution ever overtakes those who are vain enough to think they can trifle with the affections of the fair sex.

To the regret of many people the world over, the brave spirit of Lawrence of Arabia has fled to the regions beyond. Like David Livingstone and General "Chinese" Gordon, this brilliant son of old England will be remembered by his people for the noble and unselfish deeds which marked his career.

With but scanty military knowledge to aid him, he organized and led a great host of desert warriors through the varying fortunes of war until one evening he heard the murmurings of old Damascus calling him faithful to prayer.

In the years to come the motherland may have to face many trials and tribulations, but so long as such a son produces men like Lawrence, no need fear for her future.

Although few individuals still advocate, accession of the west as a remedy for economic ills, the great majority of our people display little interest in the subject. Perhaps it is because they realize that east and west are bound together by ties which cannot be severed. Split in the difficulties of this country would multiply so rapidly that many people would leave it in despair. Apart from the monetary considerations, men who favor disunion forget the power of national sentiment. Before the Great War, Canada was just a group of provinces loosely joined together, with each one seeking profit at the expense of the other.

But from the horrors of war came to us a unity of spirit which will endure for centuries. Perhaps it is not being used to the extent it may be in these troublesome times, but everywhere it demonstrates its usefulness by permitting the great majority of Canadians to accept with amusement the vainglorious utterances of individuals who preach secession.

According to the latest news, Mr. Bennett may be compelled to forsake the political field on account of his health.

But although we have never supported the prime minister's party, like many others we have nothing but respect and admiration for this sturdy Canadian who piloted the ship of state through many dangerous hours, and if circumstances compel him to retire from public life, he is certain to carry with him the good wishes of his fellow countrymen, regardless of their political beliefs.

YES, SIR!

Here I lie upon the bed,  
Throat so dry and throbbing head,  
Woodshed eyes and body sore,  
The morning after the night before.

Can't eat nothing, got no pep,  
Lost my money and lost my pep,  
Can't get up, I feel so bad,  
Boy, what a wonderful time I had.

Never felt so bad before  
Even my darned old tongue is sore,  
I'm a mess, I still can't sit up,  
Gosh what a party it must have been.

Can't remember where I went,  
Don't know where the time was spent  
But wow, what a time it musta bin,  
Look at the helluva shape I'm in.

EDITS & ARTICLES

**Peterborough vs Lindsay**  
The Peterborough (Ont.) Examiner is disgusted with a Lindsay magistrate for suspending sentence upon several drunken car drivers. The Examiner favored jail terms. Knowing that Lindsay, which these two neighboring burghs have always displayed to each other, we are only amazed that the Examiner displayed such a merciful attitude. It should have been nothing short of life at Portsmouth, especially if the culprit claimed Lindsay as their domicile.—Hanna Hargreave.

**"What does it matter . . ."**  
Clareholm is going to have a day of sports on July 3rd. Sports are a sort of national safety valve and something appears just so stimulating as inter-town contests and the concentration of a crowd on pleasure bent. The success of the day is largely marked by the size of the crowd, modified by the character of the program. Clareholm has been doing nicely in their program, and even though no money is made, as Grace Allen might say: "What does it matter so long as we're happy"—Local Press, Clareholm.

**Interests Outside School**  
It is common, high school students, in causing some concern among the board members, and it is feared that some regulations will have to be passed to prevent social activities from interfering with school work. It is felt that there are some cases where students do not make a reasonable effort on their own parts to justify the expense of their education, and that disappointment in examination results is inevitable. It is understood that the board is seriously considering regulations which will compel more attention to school work, or the elimination of students who fail to take an interest in their work.—Melrose Gazette.

**Freedom of Press**  
A judge in Indiana sentenced an editor to ten days in jail and to pay a fine of \$100 for criticizing the court. The editor appealed the case to the supreme court, and the verdict was reversed, and this intonation was appended: "The right to comment freely and criticize the actions, opinions and judgments of courts is of primary importance to the public generally. Not only is it good for the public, but it has a salutary effect on the courts as well. Courts and judges are not, and should not be, above criticism, and as long as they are not impeded in the conduct of judicial business by publications having the effect and obstructing the enforcement of their orders and judgments, or of impairing the justice and impartiality of the verdict, there is no right to enforce a contempt proceeding."—Olivia Times.

## MOTHER'S LOVE

By TIM LONGBOTHAM

Be ye pauper, prince or slave,  
Kind of heart or cruel knave;  
Morn and night, through storm and shine  
Mother love is ever thine.

Friends may come and friends may go;  
Fortune send thee weal or woe,  
But through sorrow, strife and glee  
Mother love will cling to thee.

Steadfast through the flight of years,  
Rising over hopes and fears,  
Swift to answer weary sigh—  
Mother's love can never die.

Winging over hill and sea,  
Faithful, strong, whatever may be,  
Brightest when the shadows fall—  
Mother's love is best of all.

Bright Stories  
about Wine

IN VINO VERITAS

● We read the other day a curious book called: "The Wine Room Murder", by Stanley Trepal. We do not recommend it to wine drinkers although it develops a theory that might be interesting to many of them, and particularly to wine growers. The hero of the story is a wife nibbler who undertakes to solve a murder, and works on the principle that there is a wine for every mental mood. If he wishes to be reflective there is one wine; if he wishes to be intensely on the alert there is another, and if he wishes to plunge himself in a state in which every outside impression will register, there is still another wine that will help to this end.

● Similarly, he argued that different wines would induce different moods in the persons who were suspected and that on the whole the old Latin saying that in wine there is truth, is sound, and can be turned to practical use. There is, of course, something fantastic to the Canadian in his ascription of special virtues to special vintages. To the real European epicure there is as much difference between, let us say, a Burgundy and a Meloc, as Canadians would find between sarsaparilla and ginger ale, or cider and rye. The real wine connoisseurs drink wines not for what we call the "kick", but for somewhat the same kind of pleasure that they derive from a picture gallery. There will be a vast improvement in the habits of Canadians if ever we reach that stage of civilization.

## CHAIN LETTERS

(From the Vancouver Sun)

A lot of people have been telephoning this office about the chain letters that are flooding Vancouver just now.

It seems that some of these addressees don't know just what to do with them.

We have always been very good at figures, so we will endeavor to make it clear.

You see, when you get a chain letter there are five or six in it six names on the top of it.

You send just one, this time to the name at the top of the list and then in the five letters you send out you include your name at the bottom of the list, leaving the top name off.

Do you get that?

Alright then.

Now all you send out is one ten-cent piece. What you eventually get is \$1,560.50.

That is what puzzles people. They can't see where the \$1,560.50 comes from, the nineties.

And it's so simple.

You see there are five names on the list. And each one sends a dime.

You multiply the five by five, and add—

Oh, yes. There are five names on the list and each one sends his uncle a dime. Now what a minute—and you multiply the uncle.

But that doesn't seem to make sense either.

Now we'll take it very slowly.

There are five names on the list. Remember that, five. Each one sends a dime—the tenth part of a dollar.

You multiply the five dimes by the total number of the Dime, babies' teeth as the 23rd ultimo.

What's that? What have the Dime babies' teeth got to do with it? You don't know?

Well, you darn foot!

Alright then, for the benefit of the slower members of the audience, we will try it again.

There are five names on the list. Damn them! Each one swallows a dime. That is each one sends a dime. That makes fifty cents.

Now we're getting somewhere.

Everybody gets fifty cents and buys five hairs.

Hold on a second, that's not right. No, everybody gets fifty cents and you multiply that fifty cents by the number of angels that can dance on the point of a needle almost any Whitsuntide. Then from that figure you subtract your income tax and add the number of feet in a mile or a dash of paprika or whatever you think best. Then you divide by the number of yards Aunt Matilda can spit without hot plate. Then you multiply again by 235 and immerse the whole thing in a bucket of elder vinegar matured in a waning moon on the lee side of a quint-eyed paper hanger's rose house.

Just how in hell do you get that money anyway?

Well, you darn foot!

Alright then, for the benefit of the slower members of the audience, we will try it again.

There are five names on the list. Damn them! Each one swallows a dime. That is each one sends a dime. That makes fifty cents.

Now we're getting somewhere.

## CANADIAN JUBILEE BEACON CHAIN

The coast-to-coast chain of beacons by which Canadian Boy Scouts celebrated the King's silver jubilee on the evening of May 6 proved the greatest event of its kind in the dominion's history. Fires stretched from Sydney on the Atlantic, to Prince Rupert on the Pacific, and burned from Signal Mountain, 7,400 feet up, to Jasper national park. The mid-Canada bonfire at Winnipeg was lighted by Lord Baden-Powell himself, in the presence of a crowd of many thousand spectators, and at Edmonton, in the presence of a similar crowd, a huge beacon was lighted by Lieut.-Gov. Walsh. The Canadian scout chain carried across North America the great scout beacon in England, where some 2,000 beacons burned between John o' Groats and the Guernsey Islands.

## PROPHETIC WORDS

The editor of the Toronto Globe recently recalled these words spoken to him in 1914 by Premier R. B. Bennett, then a private member of the house of parliament. Their prophetic content is interesting:

"Let me tell you that if over this young country should run into a period of severe and prolonged depression—such a period of hard times and unemployment as has been known to other countries in world history—those men at the helm will have to pay in costly measure for the prosperity of today. They will have to atone for the exploitation of the public at the hands of self-centred and predatory interests by bitter doses of taxation, by radical experiments, by revision and reform of the whole capitalistic system—or face something of far sterner significance and more devastating consequences."

## IS FOUND HANGING

A fatal step may end the most happy life. The most cultured, refined, beautiful and best loved are no exception to the same fate. A father's devotion, a mother's fond care, a brother's or sister's companionship, will not shield them when they desire to take the step. All this happened last Monday evening when one of the highest educated, most refined and vivacious girls was found hanging in the home-parlor, surrounded by all the luxuries that go to make a happy life. Late in the evening she was missed and careful search failed to reveal her whereabouts.

The telephone was used without results. Her friends were called to help search for her. Finally the almost broken hearted mother returned to the parlor and there to her horror and surprise she found her beloved girl hanging.

How must that mother have been affected by what met her gaze. There was her daughter hanging, to her sweetheart's neck begging him to subscribe to The Mail in order that he might be better informed as to the current news of the community by reading the newest newspaper. We admit we awed this story from another paper, and that paper admits swiping it from some other one, but it is too good to keep.

## FIVE CONVENTIONS FOR ALBERTA

Five conventions of a more or less national character will be held in Alberta this year. The Canadian Seed Growers association and the Canadian Society of Technical Agriculturists, which includes within its ranks prominent agriculturists, all over the dominion, will meet in Edmonton during the weeks of June 19 and June 24. Sir Francis Flood, British minister to Canada, will speak at the latter convention. The Western Canada Dental association will meet in Calgary the latter part of June, and the Canadian Federation of Business and Professional Women's clubs will meet in Calgary the first week in July. In the fall the Dominion Amputation association will meet in Edmonton.

## "TOO MUCH WEALTH IN THE HANDS OF A FEW PEOPLE"

In the countryside, in streets of villages, towns and cities; in homes, in market places, from pulpita and public platforms; from men in many walks of life you hear the same pronouncement: "Too much wealth in the hands of too few people."

Who can rectify such an unsatisfactory state of affairs?

In many instances the people themselves have the remedy.

In the grain business the grain growers have the remedy in their co-operative marketing organization. All they need to do is to give their patronage.

Co-operative organization is the most effective means of preventing accumulation of great fortunes in the hands of a few people. Co-operation never makes millionaires. Patronize—

The depressed price of farm products is a problem with which everyone is familiar, but on the 1913 basis farm product prices have never been as low as gasoline. Between 1913 and 1920 gasoline did not rise in price to nearly the same extent as farm products, yet since 1920 its price has almost continuously declined. The data for the above graph are based on figures published by the Dominion Bureau of Statistics.

## A FAIR DEAL POLICY

In the fifty-four years of its existence, Imperial Oil Limited has always welcomed legislation in the interests of labor and the basic industries. It has never had a labor dispute. It has always paid fair wages. To the greatest extent possible it has provided continuous employment and it has given its workers increasing leisure so as to expand employment. It has sickness and death benefits and old age pensions because it believes that the worker and his dependents are entitled to such protection.

Imperial Oil has always tried to deal fairly with collateral industry and with its competitors. Its success in this connection is indicated by the fact that it has never had a major lawsuit. It has always recognized the principle that the only satisfactory business transaction is the one which affords a fair profit to all parties concerned. It has fulfilled all its undertakings. It has enforced no onerous claims on others.

Imperial Oil has always tried to deal fairly with the consumer. It has continuously improved the quality and steadily reduced the prices of its products. It has invested millions to make these products always available wherever they may be needed.

In 1934 Imperial Oil earned \$3,075,000.12 from its Canadian manufacturing and marketing operations. This, you may say, is a lot of money, but to earn that amount Imperial Oil had to make and market goods to a value of \$82,841,111.15. The stockholder who for the course of a year sold \$8,280 worth of goods and made a profit of \$100 would not be regarded as enjoying an undue measure of prosperity. But his ratio of profit to the total volume of the business would be the same as Imperial Oil's.

It has been Imperial Oil's practice to "make wisely, measure truly, trade justly" for this it believes to be the secret of success.

The Sign of a Fair Deal

Migration Of The  
Canada Goose

By Maury F. Miner

Much has been said by various writers and authors describing the origin and history of the Jack Miner Sanctuary, but to me the big achievement there has been scarcely mentioned, namely, the catching and tagging of the Canada Goose to study its route of migration in both spring and fall, and to find where it nests and raises its young during the summer months.

It was in 1902 and 1903 that Jack Miner conceived the idea of establishing a bird sanctuary, the first of its kind in Canada, if not on the continent. But not until 1904 was work on the sanctuary actually started.

At that time, excavations made for ponds, several wing-tipped decoy geese placed on same, and corn spread plentifully around the banks, ducks and geese, in a short time, found this to be a place of safety. Both the conservationists and the hunters were back of the Jack Miner scheme because the sanctuary, taking nothing from the hunters, constantly built up the hunter's chance. At the same time the birds became used enough, when shot at that time, to find the sanctuary, where they were unprotected, to look after their safety zone and have of rest.

Eventually, the birds commenced to congregate on the sanctuary in large numbers. Jack Miner had no gun, but he was not afraid to study and find out where these feathered creatures spent each year. He was not afraid to study and find out where these feathered creatures spent each year.

He was not afraid to study and find out where these feathered creatures spent each year. He was not afraid to study and find out where these feathered creatures spent each year.

He was not afraid to study and find out where these feathered creatures spent each year. He was not afraid to study and find out where these feathered creatures spent each year.

—Crawled White Bird Photo.

Here is two-year-old Willie McManus, who travelled all the way from Glasgow to Canada by himself on the Anchor-Donation liner, Athena.

Willie arrived at Montreal none the worse for his adventure and seemed very happy to say "good-bye" to the Stewards and Stewardesses.

He was photographed at Montreal with his little suitcase just before leaving for Toronto where he will visit his aunt and grandmother who reside at Brookville Avenue, Toronto.

far as Haffin Land of tagged geese.

On one occasion the Rev. W. G. Walton, an Anglican missionary, who spent several months in the area, came by canoe from Hudson's Bay to Cochrane. Taking the train from Cochrane to the sanctuary, he brought a pocketful of tags each of which bore a passage of Scripture and Jack Miner's post office address. He had collected these from the Indians and Eskimos all the way from Moose Factory, James Bay, along the east coast of Hudson's Bay, and as far north as Haffin Land. The natives had brought them to him for interpretation of the verse of Scripture.

Through these tags, this devoted Christian missionary, together with the Hudson's Bay fur dealers, and the agents of Revillon Freres Fur Company, who have also cooperated to a great extent in collecting them from the natives, a lot of valuable information as to why these birds nest around the shores and islands of Hudson's Bay and Haffin Land, and instead of along the rivers and streams has been revealed to the civilized world.

The geese arrive in that vicinity around the latter part of April or the first of May. The rivers and all fresh water are all frozen over at that season of the year, but the Hudson's Bay is opened up by the incoming ocean current and the geese prefer to nest where there is open water.

The tagging system has also revealed where they spend their winters. Each tag bears a date and it has been proven that very few geese which visit the sanctuary in the fall visit in the following spring, as practically all geese having tags were killed in the Middle States, along the Atlantic Coast side of the Gulf of Mexico, while geese which are tagged in the spring winter along the Atlantic coast, mostly around Carriack Sound. The geese which spend the winter along the Atlantic seaboard nest, in the extreme northern portion of Hudson's Bay and Haffin Land. When the fall comes and it turns cold instead of drifting inland, they follow the Labrador coast by the way of Labrador, Newfoundland, and the New England coast, southward to Carriack Sound. But when March and April come, it is too warm in North Carolina for them. The Labrador coast and their summer quarters, where they are still found, are still too warm for them. The geese, therefore, migrate north from the South.

There have been tagged nearly 13,000 geese since 1915, and year after year those that are not killed return to this protected property, wearing their bright aluminum bands around their legs. Last fall one hundred geese of the 500 which stood on the pond in one of our ponds were tagged. The pond is one acre in size and is about 1 foot at the north of Hudson's Bay in my old school geography, there are a few words or anything small enough to represent in proportion one acre on it. Even the dot of pencil would represent several miles. Yet the most remarkable thing about the migration of these birds is that year after year, as regular as the sun rises those that are tagged in the fall will come back to the Jack Miner Bird Sanctuary, at Kingsville, Ontario, Canada.

## Recipes For This Week

(By Betty Barclay)

## BRAIN SPOON MEAT

- 1/2 cup corn meal
- 2 cups milk
- 1/2 cup all-bran
- 3 eggs
- 1 tablespoon butter
- 1/2 teaspoon baking powder
- 3 teaspoons sugar
- 1 teaspoon salt

Stir cornmeal into 1 1/2 cups milk. Remove from fire, add all-bran and butter. And well-beaten eggs, milk, butter, baking powder, sugar and salt. Bake at 400 degrees F. for 20 minutes. Turn out in a 10-inch dish or press for 20 to 30 minutes.

## STUFFED EGGS

Shall hard cooked eggs and cut in halves lengthwise. Remove yolks and mash well. Add to mashed yolks a small amount of soft butter, finely chopped mustard, cucumber pickle, sufficient of the mustard dressing from the pickle to moisten the egg yolks, and salt to taste. Fill egg whites with prepared mustard. Sprinkle lightly with paprika.

## JACKET DRESS IN SIZES TO 48

By Ellen Worth

Extremely attractive, slimming and comfortable to wear. There are so many things about this smart jacket dress that the fuller figure will find helpful and charming. Its open V-neckline and prettily arranged bodice closing are exceedingly slimming. Yellow and white tub silk print we used for it, while the cross-over bodice was plain yellow.

Checked handkerchief linen, eyelet, lattice, dotted voile, striped, herringbone, etc., are other suitable fabrics so cool and smart looking.

Style No. 877 is designed for sizes 38, 40, 42, 44, 46 and 48 inches bust. Size 36 requires 3 1/2 yards of 39-inch material with 1 1/4 yards of 39-inch material.

Patterns 20c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermott Ave., Winnipeg.

The Spring Fashions Magazine is better than ever. Entirely illustrated in color you will find it a very stimulating fashion edition. There are clothes for clothing and clothes to brighten the lives of stay-at-homes. Many delightful little models for the smaller sizes of the fashions of course, patterns are obtainable for your copy to-day, the price is 50 cents.

## New Offensive Planned

Grasshoppers Killed In Larvae Stage Would Protect Farms

A new offensive against grasshoppers that would take attackers to the insects' permanent breeding grounds and prevent the recurring plagues by destroying the insects before they assumed obnoxious proportions, was favored in a statement issued at Lethbridge by eminent entomologists of Canada and the United States.

The experts, following a six-day conference, reported the program in future would be to search out isolated areas where grasshoppers breed in years of no general infestation and start the poisoning campaign there.

The conference, outcome of appointment last year by the Dominion Government of a committee to draw up a scheme of permanent grasshopper control, felt such a plan would make farms safe from grasshopper plagues and farmers would not be occupied, so in the last two summers, scattering poison bait for weeks on end.

## Explore Upper Strata

To Build Rocket That Will Ascend Distance Of 34 Miles

A Soviet stratosphere committee on the construction of a rocket expected to ascend 50 kilometres (about 31 miles) at a speed of 70 metres a second, or more than twice the speed of sound at a temperature of zero centigrade.

The rocket would take up automatic scientific instruments, which would be the maximum height would descend by parachute.

## SPECIAL OFFER 10c.

## SPRING FASHION BOOK

For the next two weeks the latest Fashion Book (regular price \$2.00) will be sold at 10c when ordered with a pattern.

—See Mail Address Below—

Banff's Famous  
Hot Springs

Radio-Active Waters Have Acquired A World-Wide Reputation

Among the chief attractions of Banff, in Banff National Park, Alberta, are the hot sulphur springs on the hills from the side of Sulphur mountain. They are numbered among the most radio-active waters on the North American continent and are required a world-wide reputation by reason of their curative properties. These springs were known to the Indians who inhabited the region for generations prior to their discovery by the white man around 1880. There are five chief springs at Banff, namely, the Upper springs, the Lower springs, the Middle springs, and the Cave and Basin springs.

Development of these springs by the National Parks Service of the Department of the Interior has taken place at the Upper Hot Springs and at the Cave and Basin Springs. The former are located two and a half miles from Banff on the slopes of Sulphur mountain. A bath-house and pool have been constructed at these springs. The waters of the 80 foot by 200 foot pool have a temperature of 112 degrees Fahrenheit. The bath-house contains steam rooms, tubs, plunge, hot and cold sprays, and rooms. At the Cave and Basin springs there are two swimming pools, with waters of varying temperatures, and dressing rooms for visitors.

## Running Close Race

Great Britain Slightly Ahead Of Germany In Wireless Licenses

Great Britain and Germany are running a hot race for the highest number of wireless licenses.

By the end of 1915, the number of licenses of the International Broadcasting Union, Britain had issued 6,688, 727 licenses to radio fans, while Germany had issued 6,000. Soviet Russia was a bad third with 2,323, 000, and France fourth with 1,755, 846.

The development of broadcasting in other European countries is comparatively backward, according to the union's figures. Italy's total number of radio fans was estimated at 430,000. Spain's 213,000 and Portugal's only 29,283. Belgium has 620,000, Switzerland 366,236 and Sweden 733,190.

Japan takes the lead in eastern countries with a total of 1,897,398 licenses issued.

## Noted Aviator Fined

Investigating Crash Flies. Mrs. John Johnson, noted woman flyer, was fined 10 shillings (about \$2.40) in Bridlington, Eng., on a charge of driving an automobile without a license.

A policeman who investigated an accident April 19 in which a motorcycle rider was killed in a collision with Mrs. Mollins' car, said she had been unable to find her license and that when it was produced two days later it was found to have expired.

Mrs. Mollins testified her secretary had neglected to renew it.

## Moved Court By Air

Australian Judge Used Plane To Speed Up Justice

Judge Wells of the Assize Court at Port Darwin, Australia, recently used an airplane to speed up justice. Instead of summoning all concerned in a case to Port Darwin the judge moved his court by air to Alice Springs, 1,000 miles distant across barren country. With him he took the crown prosecutor and the officials of his court. By his action Judge Wells saved the long trek to Port Darwin of a large number of witnesses, police officers and prisoners.

## Bees Wintered Well

Both in Canada and the United States bees came through the winter in good condition, according to reports. Outdoor wintering was confined, to their hives for three months though there were occasions when the cluster could move onto fresh honey. It is long continued spells of zero and sub-zero weather that prove disastrous to bees.

The average child acquires 80 per cent of his education through his eyes, says the U.S. National Society for the Prevention of Blindness.

London received its first successful cargo of meat from Australia in 1880.

Shorthand was invented in the days of the Romans.

## Advances New Theory

Fruit Expert Thinks Eve's Apple May Have Been Pear

It was, according to Eve's Apple, which started the world's first family trouble, was a pear. Such was the theory advanced by Lloyd C. Stark, horticulturist of Laramie, Wyo., and authority on fruit origins.

In ancient days, said the horticulturist, the Chinese believed eating a certain kind of fruit would bring immortality and preserve the body from corruption. The peach tree was the "Tree of Knowledge," the Chinese and it may have been that the apple eaten by Eve in the Garden of Eden after all was the Persian apple or, as it is known to-day, a peach.

## The Fireproof Fireman

Special Anklestap Suit For Brigade In Sheffield, England

The fireproof fireman has arrived. The Fire Brigade of Sheffield, England, has just taken delivery of a special anklestap suit, which will enable the fireman-wearer to walk with impunity in the fiercest flames. He will be able to effect repairs and salvage work unhampered by the heat. Sheffield is the pioneer city in adopting the suit, which has been subjected to the most vigorous tests. Fire brigades in other parts of the country have been awaiting the great interest of the experiment with great interest.

## Success After Ten Years

Invents Window That Admits Light And Air But Not Noise

A new sound-proof window, which admits light and air, but not noise, has been invented by R. T. Plak, chairman of Amalgamated Wireless, Australia.

The design of the window, which has just undergone successful tests, is the outcome of ten years of practical experiments by Plak. It employs the principle that most sounds can be reflected or absorbed if certain materials are applied to the surfaces which the sounds are striking.

Mistress—This pie is absolutely burnt, Nora. Did you make it according to the instructions in the Cooking Book?

Nora—No, ma'am. It's my own creation.

"What do we do now?"

"Well, if the movies are right, miss, you sit on my knee."

—Sydney Hullett, Sydney, Australia.

## U. F. A. LOCAL TO MEET

The Bassano Local U. F. A. will hold a meeting on Tuesday, June 4th at 8:30 in the Countess Hall.

## ANNOUNCEMENT

## Local and Personal News

## HUSSAR

Mrs. V. P. LeGrandeur returned from Maple Creek on the 24th. The Misses Lois Nelson, Nettie LeGrandeur and Wilma Leggat came down from Calgary on Thursday with Mr. and Mrs. W. G. Nelson, and returned on Saturday with Mr. E. J. Bell.

Miss Anna Hole and Mrs. E. J. Bell attended the W.I. provincial convention in Edmonton, May 21 to 24.

The Misses Berna Leggat and Inez Byers and Messrs. H. Rooney, Johnnie Toogood and J. A. Collins motored to Calgary on Thursday evening for the week-end.

The first meeting of the Hussar Local Teachers' Institute was held in the school house on Thursday afternoon, under the supervision of Inspector W. E. Frame. The officers elected are: Hon. president, W. E. Frame; president, J. A. Collins; vice-president, J. Toogood. The program consisted of a talk by Mr. Collins, then Mr. Frame outlined the purpose of the meeting and gave a brief report on the new course of studies, and outlined the fall convention in Drumheller. Miss Leggat gave a talk on primary reading; Mr. Frame gave a short talk on the characteristic differences between good and bad teachers. Miss Sykes gave a short talk and led a discussion on methods of teaching and reviewing history.

Calgary gave a talk on arithmetic. It was decided to have three meetings a year.

The Guides, Rangers, Brownies and Scouts will, in services conducted by Rev. H. E. Jordan of Langdon on June 2 at 2:45 p.m. are invited to attend.

Holles' annual horn dance will be held on June 14 with the Medicine Hat Serenaders.

## WANT ADS

FOR SALE—Grimm alfalfa seed, No. 1, 25c a lb. A. D. Ferguson, County, 42-446

## Notice to Creditors and Claimants

IN THE ESTATE OF ALEXANDER J. CULBERTSON late of South Natick in the State of Massachusetts, United States of America and formerly of Bassano, Alberta. Retired Dentist, deceased.

NOTICE IS HEREBY GIVEN that all persons having claims upon the estate of the above named ALEXANDER J. CULBERTSON who died on the 21st day of July A.D. 1934, are required to file with the undersigned by the 30th day of June A.D. 1935, full statement duly verified of their claims and of any securities held by them, and that after that date the undersigned will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or which have been brought to their knowledge.

DATED this 21st day of May A.D. 1935.

## THE NORTHERN TRUSTS CO.

Calgary, Alberta.

## NOW IS THE TIME

## Parents Attention!

A meeting to consider the present High School plan will be held Monday, June 3rd in the Town Hall at 8:00 p.m.

Do You Want the Present System Continued?

This question is of the utmost importance as the board refuses to carry on under present financial arrangements.

**ALL PARENTS OF HIGH SCHOOL STUDENTS PLEASE ATTEND**
